

## Crawshaw Collection

A world ranked collection of 17 John Deere tractors and associated memorabilia received from Ferg Crawshaw, a highly respected member of the Manawatu Vintage Machinery Club, and the man who has been collecting John Deere tractors for more years than he cares to remember. This collection has been restored and presented in magnificent condition.

So where do tractors fit into the horse drawn era? They don't! But they do continue the progression of agriculture into the age of mechanisation, and an opportunity too good to pass up. It depicts the historic and continuing importance of farming and the agricultural history of Feilding and the districts of the Manawatu.
